Capability Statement

Lucan Engineering Pty Ltd was founded in 1999 specialising in servicing the local Australian manufacturing industry as a producer of precision engineered components, for production machinery end users and project engineering companies.

In later years Lucan expanded its operation and services to include, full scope of supply, encompassing conceptual design and manufacture, through to complete project build and installation at the customer's site.

We are a 100% privately owned Australian company employing 50 staff in our 5,000m² production facility located at Lidcombe in New South Wales.

Lucan Engineering aims to exceed our customers' expectations of quality, delivery, and value, through continuous improvement in engineering and customer interaction.
